

DEA Required 8-hour Training for Opioid Prescribing and Pain Management for Dental Professionals

Friday, June 9, 2023

Zoom Webinar

Preliminary Program

8:00

Welcome and Overview

Angie Rake, DDS

Overview of substance use disorders

How is SUD currently defined?

Current statistics of SUD in the US

The top four substances of misuse in the US and how they may impact dental procedures and oral surgeries

Special considerations of patients with opioid use disorder

Understanding Buprenorphine

Special considerations/agreements when prescribing opioids.

Communication with patients and medical specialists regarding pain management

9:30 Break

9:45

Identification and Management of Opioid and Substance Use Disorders in Pediatric Patients

Scott Hadland, MD, MPH, MS

Describe alcohol and drug use in early adolescence with progression to substance and opioid use disorders in late adolescence

Discuss the neurocognitive effects of addictive substances on the developing adolescent brain

Discuss patterns, trends, epidemiology, and contributing factors to opioid and other substance use/abuse among the child and adolescent population

Highlight similarities and differences, and discuss challenges of adolescents with co-occurring substance use and psychiatric disorders

Discuss how the dental team can identify and manage substance use and withdrawal syndrome behaviors in patients

Recognize and deliver safe dental procedures for children and adolescents who are actively using alcohol and/or other drugs

Deliver safe dental care to children and adolescents currently receiving treatment for substance and opioid use disorders

Develop strategies for brief interventions, referrals, and resources for children, adolescents, parents, and caregivers

11:45 Break

12:15

Mixing Common Prescriptions with Pain Management Medication: Insights from Your Local Pharmacist

Ashley Duggins, Pharm D

- Identify the ten most prescribed medications in adults and pediatrics
- Recognize common dental issues associated with certain disease states
- Discuss the ten most prescribed medications and what types of pain management medications are most effective
- Recognize complications that prescribed medications can cause regarding dental health
- Identify limitations various federal mandates have on dentist's medication prescribing
- Understand the role of a clinical pharmacist in improving dental health
- Develop a cheat sheet with the right pain medication choices for patients with specific disease states

2:00 Break

2:15

What Happens After You Identify and Refer Patients with Opioid and Other Substance Abuse Disorders?

Evan Rosenthal, LPCC, LADC

- Evaluate best practices in referral by analyzing case studies
- Implement screening tools, such as the Opioid Risk Tool (ORT) or the Screener and Opioid Assessment for Patients with Pain (SOAPP), to identify potential cases of opioid abuse
- Recognize signs of opioid abuse, including changes in behavior or mood, frequent requests for early refills or lost prescriptions, and evidence of drug-seeking behavior
- Utilize prescription drug monitoring programs (PDMPs) to track patients' prescription histories and identify potential cases of opioid abuse or diversion
- Refer patients with suspected addiction to specialists, such as psychiatrists, addiction medicine physicians, or substance abuse counselors, for evaluation and treatment
- Implement medication-assisted treatment (MAT) for patients with substance abuse disorders
- Identify how teens, young adults, adults, and seniors with substance abuse disorders may present in the dental clinic
- Evaluate the prevalence of substance abuse disorders among LGBTQ+ patients
- Compare and contrast substance abuse trends in urban versus rural areas
- Provide educational resources for providers, patients, families, and caregivers related to opioid abuse and addiction
- Assess what happens after a referral and identify what providers should know

3:45 Adjourn

To receive the full 8 hours of training, you must complete the pre-course readings (approximately 1.25 hours), attest that the readings have been completed, and attend the full 6.75 credit hour Zoom presentation.

Meet Our Course Director

Angie Rake, DDS, received her Doctor of Dental Surgery degree from the University of Minnesota School of Dentistry in 1997. She then completed an Oral and Maxillofacial Surgery Internship at the Minneapolis Veterans Affairs Medical Center. She graduated from the Oral and Maxillofacial Surgery advanced training program at the University of Minnesota. In 2002, Dr. Rake joined Dakota Valley Oral and Maxillofacial Surgery. She remains active as an Adjunct Associate Professor in the Division of Oral and Maxillofacial Surgery at the University of Minnesota School of Dentistry. She lectures on numerous topics locally and nationally. She has gained national attention for safe and responsible opioid prescribing and office-based anesthesia. She has been featured in the New Times, Washington Post, NBC Universal, and local media outlets. Dr. Rake is a Diplomate with the American Board of Oral and Maxillofacial Surgeons. She is a member of the American Association of Oral and Maxillofacial Surgeons, American Dental Society of Anesthesiology, American Dental Association, Minnesota Dental Association, and Minneapolis District Dental Society. Dr. Rake is the past President of the Minnesota Society of Oral and Maxillofacial Surgery. She serves on the Clinical Governance Board with US Oral Surgery Management, an NIH-NIDAMED Contracted Panelist, and an appointed member and President of the Minnesota Board of Dentistry.

Meet Our Experts

Ashley Duggins, Pharm D, is co-owner and pharmacy manager of Prevo Drug in Asheville, North Carolina. She graduated from the University of North Carolina at Chapel Hill with her Doctorate of Pharmacy degree. Dr. Duggins specializes in bio-identical hormones (BHRT) and health coaching. She is also the pharmacy manager for Enclara Pharmacia-Hospice of Randolph, North Carolina. Dr. Duggins is very committed to community involvement. She is currently a member of the Randolph County Opioid Collaborative Committee and the Asheboro Randolph Chamber of Commerce and serves on the Board of Directors for Uwharrie Charter Academy. Dr. Duggins was elected to serve on the North Carolina Board of Pharmacy.

Scott Hadland, MD, MPH, MS, is the Chief of Adolescent and Young Adult Medicine at Mass General Hospital for Children and Harvard Medical School, and a pediatrician and addiction specialist. He holds triple board certification in General Pediatrics, Adolescent Medicine, and Addiction Medicine. Dr. Hadland has authored more than 100 peer-reviewed scientific publications, and collectively, his 14 mentees have received three national research awards under his direct supervision and published 15 manuscripts. His work has been published in leading medical journals, including The Lancet, BMJ, Pediatrics, JAMA Internal Medicine, and Addiction. Dr. Hadland is on the Editorial Board for the journal Pediatrics, and previously served on the Editorial Board of the Journal of Adolescent Medicine and was an Associate Editor for the International Journal of Drug Policy. He has been recognized with numerous national awards and has received research funding from the National Institute on Drug Abuse, US Centers for Disease Control and Prevention, Thrasher Research Fund, American Heart Association, and Academic Pediatric Association, and his research and writing has been featured in The New York Times, Washington Post, CNN, USA Today, Newsweek, NBC News, CBS News, National Public Radio, and other leading news outlets.

Evan Rosenthal, MS, LPCC, LADC (He/They) is a Psychotherapist with Transcend Psychotherapy and a national presenter focused on LGBT+ Mental and Chemical Health. They work primarily with LGBTQIA+/trans/non-binary/gender-expansive clients. They use lived experiences from daily living,

medical, and therapy settings, alongside research, reading, and other training to offer individual and broad depictions of gender-affirming care. They provide national and regional consultation and training in academic, corrections, and other large systems using an intersectional social justice lens and experiential and didactic approaches. Evan is also a board-approved supervisor for LPC and LPCC licensing in Minnesota. Their education includes Clinical Supervision Training, a Master of Science in Mental Health Counseling and Chemical Dependency from the University of Wisconsin – Stout, studies at the University of Limerick, and an undergraduate degree from the University of Wisconsin-Stevens Point in Psychology and Sociology.

Disclosure Summary

It is the policy of the University of Minnesota Office of Continuing Dental Education to ensure balance, independence, objectivity, and scientific rigor in all its sponsored educational activities. All participating speakers, course directors, and planning committee members are required to disclose to the program audience any financial relationships related to the subject matter of this program. Relationships of spouse/partner with proprietary entities producing health care goods or services should be disclosed if they are of a nature that may influence the objectivity of the individual in a position to control the content of the CDE activity. Disclosure information is reviewed in advance to manage and resolve any possible conflicts of interest. Specific disclosure information for each speaker, course director, and planning committee member will be shared with the audience prior to the speaker's presentation.

Continuing Dental Education Staff members have nothing to disclose.

The speakers disclosed the following information for this course. It is not assumed these financial interests or affiliations will have an adverse impact on course presentations. They are provided to inform course participants fully.

Angie Rake, DDS

Indicated no relevant affiliations or financial interests and does not intend to discuss off-label/investigative use of a commercial product/device.

Ashley Duggins, Pharm D

Indicated no relevant affiliations or financial interests and does not intend to discuss off-label/investigative use of a commercial product/device.

Scott Hadland, MD, MPH, MS

Receives grant or research funds from NIH/NIDA and the CDC and is a consultant/speaker for the American Academy of Pediatrics. Dr. Hadland does not intend to discuss off-label/investigative use of a commercial product/device.

Evan Rosenthal, MS, LPCC, LADC

Indicated no relevant affiliations or financial interests and does not intend to discuss off-label/investigative use of a commercial product/device.

The University of Minnesota School of Dentistry has an obligation to disseminate new knowledge related to dental practice. Some programs offered through Continuing Dental Education may introduce materials, techniques or product references that are subject to debate. Sponsorship of courses by the University of Minnesota School of Dentistry does not necessarily imply endorsement of specific philosophies, procedures or products by this institution. Recognizing that you may be learning about new procedures, techniques and materials that you may not yet be familiar with, we ask that you take every precaution when implementing these new materials and techniques into your practice.

The University of Minnesota School of Dentistry is an ADA CERP Recognized Provider.

ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry.

Concerns or complaints about a CE provider may be directed to the provider or to the Commission for Continuing Education Provider Recognition at ADA.org/CERP.
